PROFESSIONAL SUMMARY

Full Stack Developer with **2.3 years of experience** building scalable web applications using **PHP, Laravel, Livewire, MySQL, JavaScript, and WordPress**. Experienced in frontend and backend development, REST APIs, responsive UI design, role-based authentication, and database management. Delivered **25+ websites** and **4+ web applications** for clients across community, e-commerce, and business sectors.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, Bootstrap, JavaScript, React.js, Tailwind CSS

Backend: PHP, Laravel, Livewire, Node.js, Express.js, REST API

Database: MySQL

AI & APIs: Groq API, LLaMA 3, JWT Authentication

CMS: WordPress, Shopify, Joomla

Tools: VS Code, Postman, MS Excel, Canva, cPanel, Hostinger Server

WORK EXPERIENCE

Full Stack Developer – Laravel & Livewire

Feb 2024 – Present

Angika Technologies Pvt Ltd | Bengaluru, Karnataka

- Engineered a **School Management Web Application** using Laravel Livewire covering student attendance, fee management, marks cards, and role-based admin access for **500+ students**.
- Architected **role-based access control** (Super Admin, Teacher, Student) using granular permission layers, reducing unauthorized access incidents to zero.
- Streamlined **student attendance tracking** with real-time reporting and monthly analytics, saving school administrators **~3 hours/week** of manual work.
- Designed a **fee management module** with due balance tracking and automated payment reminders, improving fee collection efficiency for **500+ student records**.
- Executed **PDF report card generation** using Laravel DomPDF, enabling teachers to produce formatted marks cards in under 30 seconds.
- Enhanced **MySQL database performance** using Livewire lazy loading and query indexing, reducing average page load time significantly.

WordPress Developer – Client Websites

Feb 2024 – Present

Angika Technologies Pvt Ltd | Bengaluru, Karnataka

- Produced and launched **25+ WordPress websites** including community portals, professional association sites, e-commerce stores, and business websites across various industries.
 - Crafted **responsive, mobile-friendly layouts** using Elementor, WPBakery, and custom Gutenberg blocks ensuring cross-browser compatibility.
 - Managed website deployment on **Hostinger server and cPanel** covering domain configuration, SSL setup, security hardening, and ongoing maintenance.
 - Executed **on-page SEO strategies** including meta tags, XML sitemaps, schema markup, and Core Web Vitals optimization for improved search visibility.
-

PROJECTS

BillStack – Inventory Billing SaaS Application

github.com/kiranmailar3111-RRR

React.js · Laravel REST API · Sanctum Auth · MySQL · Tailwind CSS · Vite · jsPDF · Recharts

Full-stack SaaS for businesses to manage products, customers, invoices, GST billing, stock, and reports.

- Engineered **React.js frontend** with Vite, Tailwind CSS, protected routes, and role-based navigation.
- Designed **Laravel REST API backend** with Sanctum token auth, Eloquent ORM relationships, and structured MySQL migrations.
- Executed **automated invoice engine** — GST calculation, discount application, stock deduction, and stock log creation in a single transaction.
- Produced **live dashboard analytics and PDF invoice export** using Recharts and jsPDF from real-time MySQL data.

Multi-Website Dynamic CMS Builder

Laravel · Livewire · PHP · MySQL · Tailwind CSS · SortableJS · Spatie Permission

Dynamic website builder to create and manage multiple websites with reusable templates, dynamic sections, and role-based access from one admin panel.

- Designed **multi-tenant architecture** — Super Admin manages all websites; Client Admins access only their assigned websites.
- Crafted **modular section-based page builder** (Hero, About, Services, FAQ, Testimonials, Contact) with fully editable content per section.
- Enabled **drag-and-drop section ordering** using SortableJS with Livewire for seamless real-time page reordering.
- Embedded **SEO settings, Google Analytics, WhatsApp floating button**, and contact lead collection — configurable per website.

BotPilot – AI Chatbot Builder (Personal Learning Project)

React.js · Node.js · Express.js · MySQL · Groq AI API · LLaMA 3 · JWT Auth · REST API

Built as a personal learning project to explore AI API integration and full-stack development with Node.js.

- Explored **multi-tenant architecture** with JWT authentication and bcryptjs to understand secure user isolation and session management.
- Learned **Groq API (LLaMA 3 8B model)** integration for real-time AI chat with configurable system prompts per bot instance.
- Practised **embeddable JavaScript widget** development — widget connects live to a Node.js/Express REST API backend via CORS.
- Examined **analytics dashboard** concepts by tracking per-bot message counts and aggregating usage data from MySQL.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics & Communication Engineering

Aug 2019 – May 2023

[Sapthagiri College of Engineering, Bengaluru](#) | [VTU Affiliated](#) | CGPA: 7.2

Pre-University Course (PUC) – Physics, Chemistry, Mathematics (PCM)

May 2017 – May 2019
